ATOMRPGPostapocalypticindiegamev0534hackofflineQ: creating a simple text based scroller I am a total beginner in Python and web development, and I have a project where I want to create a simple scroller with a text header that scrolls from top to bottom and vice-versa. This is what I have so far:

```
from Tkinter import * from Tkinter import ttk window = Tk() window.title("The Headline")
window.geometry("200x200") window.state("zoomed") window.maxsize(800,300) header =
ttk.Label(window, text="This is the head...") header.grid(column=0,row=0) text =
ttk.Label(window,text="This is the text I want to scroll") text.grid(column=0,row=1) A: You can use
Ttk for that. If you are using Python 2.6+: from Tkinter import * from Tkinter import ttk window =
Tk() window.title("The Headline") window.geometry("200x200") window.state("zoomed")
window.maxsize(800,300) header = ttk.Label(window, text="This is the head...")
header.grid(column=0,row=0) text = ttk.Label(window,text="This is the text I want to scroll")
text.grid(column=0,row=1) text.configure(yscrollcommand=text.yview) If you are using an older
version of python: from Tkinter import * from Tkinter import ttk window = Tk() window.title("The
Headline") window.geometry("200x200") window.state("zoomed") window.maxsize(800,300) scroll =
ttk.Scrollbar(window, orient=HORIZONTAL) scroll.pack(fill=Y,side=RIGHT) text =
ttk.Label(window,text="This is the text
