### About This Game

**Heat Guardian** is a hardcore top-down shooter set in a freezing world. You'll have to travel through the dying lands to find the one last stronghold of humanity – trying your best to stay alive. Deadly mutants, limited resources and even the world itself make this journey a trial only the most skilled survivors can endure. In this grim place there is no easy way – prepare to fight for your life!

Our world is dead. What's left of humanity is scattered over the ruins of civilization consumed by the endless winter. Mutants are the new dominant species – they hunt down everyone unlucky enough to survive the apocalypse. And you are one of those who keep fighting for their lives amidst all the horror.

Surviving is a skill to master in Heat Guardian. Your foes are lethal and your ammo is scarce. On top of that you can't escape the main enemy – it's in the air you breathe. Cold rules everything around and surviving means staying warm. Fail – and you'll freeze to death.

#### What makes Heat Guardian special?

- Atmosphere. The world is dead, the remains of humanity are living their last days. Can you find a glimmer of hope in this cruel winter?
- A full-scale story campaign. A dangerous journey split between 40 levels – sure it won't be a brief ride.

- 
- Hardcore action. Mastering the game's combat is a process of trial and error – you'll see the 'Game over' screen a lot before learning to fight back.
  - Surviving the endless winter. Keep yourself warm and count your ammo to stay alive in this harsh new world.
  - Post-Soviet aesthetic. Heat Guardian takes place on the ruins of Eastern Europe.
  - Tools of survival. More than 50 weapon types and tools to help you in your path.
  - Fight-till-you-die mode. Additional game mode for the diehards – how long can you last against endless waves of enemies?

Travel through the dying lands of Heat Guardian and find the last stronghold of humanity!

0/10 put in Shrek. its slow , and bored,. bad: It's short: 1,5 - 3 hours

good: but worth the price, the rare seeded fights are somehow epic in a way I experienced it in no other Game. After 250 hours of VR the sense of "feeling to be inside the Game" is a little bit fading, but here it is feelable like it was the first VR day - and yes, the riddles are also ok, sometime trial and error, but ok.

PS: And I hate spiders! Had to put the Headset away for some minutes... that's awesome! I will definitely use the spider scene to torture my friends!. I'm oddly conflicted about this one. Overall, I'd say go for it if it's on sale for \$5 or less. It's a short experience that you'll want to play at least twice, and for the most part I'd say it's a pretty good entry-level game into the genre.

The good:

Soundtrack is great. It's not intense, but more tavern-like.

Atmosphere is fine. For once you're going up a tower instead of down into peril.

Good with a catch:

Lots of different classes to pick from, but there's no real unique development available except for the few SP you can pick in the beginning.

It does have some replayability to it, but the game is very short. You can practically 100% the game in 5-6 hours. Achievement runs can potentially take one playthrough if you know exactly what to pick.

The not-so-good:

Mages run out of mana far too quickly, and potions are finite. You really need to conserve your potions. Elementalists/black mages don't even get ranged spells until about halfway through the game so if you want to do any sort of ranged damage early on, You need to first find the bow in floor 2. . That said, priests/white mages can hold their ground with a hammer if they run out of mana.

The flee damage penalty is stupid. Sometimes I won't even know an enemy is near me and I'll take a step and "oh you fled you lose 25 hp and your priest dies". It becomes a bit more manageable late-game, but when you need to escape in early-game with no supplies you really need to use the environment around you to sleep. I guess it helps you be more 'strategic' but still, in a genre like this it's no longer a good idea.

What would make the game better:

Quick swap on hand selections. Less time needed to waste on opening your inventory to swap spells/weapons.

Better ranged ability.

Lessening/removing the flee damage.

Even with these points in mind, I still found I enjoyed my adventure and will play through again to get the rest of the achievements. Hope to see more in the future.. What, this game is good.

It's basically a silly Grimrock by a foreign team that was nice enough to include a proper gamepad control scheme.

---

Pros:

- +Good graphics, because again, it's basically Grimrock
- +Smooth gameplay, supports gamepad
- +Simplistic enough for casual sessions
- +Good price

Cons:

- Not complex enough to stretch your brain
- Goofy and sometimes awkward translation

If you've read this far you might as well get it.. why so many bad reviews {started off on the ktm 250 deano fast becomes world champion) Milestone did a great job, and I'm having a ton of fun the bike models look awesome and the tracks are great to ride 250cc, 600cc and 900cc motorcycles are used, depending on the race I like the sound of the engines as they roar through the circuit it presents you with full seasons of the MotoGP, Moto2, and Moto3 championships. Throttle management is key especially on the harder difficulties. When you apply the accelerator after slowing down for a corner, it is necessary to gradually and smoothly increase your speed. If you fail to do this gently, your bike will slide wide and eventually spin out In addition to steering and throttle control, you have to balance your rider appropriately for the upcoming corners. This at first is fairly difficult, especially if you have no previous experience with motorcycle games. On the standard setting, this is automatically done for you, and allows the player to concentrate on tackling corners The better you do in a race, the more fans are attracted to you and the better your racing team offers become You can sign with different racing teams thorough out the campaign, getting better offers the better you do in a race The tension and excitement of whipping across tarmac at high speed - feeling every bump, leaning into every corner should you shunt another rider you visibly nearly fall off and sometimes when you spin out and lose control your rider ends up with both legs on one side of the bike, struggling to balance which is a neat and realistic looking touch it takes time to learn and master When you first boot up the game you create a custom rider and are even able to choose avatars for yourself and your managers. You get to choose things like your clothing colours and helmet and the further you get into the game the more you will unlock Milestone has included lots of driving aids such as showing the racing line, assisting with breaking and even with cornering to help newcomers to the game The lower powered bikes you begin with are much easier to get used to and feel lighter you can check current standings via a TV, change your outfit in the wardrobe, check your laptop for emails and social feeds within the pits called the Technical Meeting where you can have a conversation with the mechanic who will assess where you are having issues Once you do get to grips with things however it becomes a truly gripping, engaging and downright thrilling ride. Obviously motorbikes differ drastically to cars and the added factor of rider weight distribution makes leaner into corners at breakneck speeds, winding through S-bends and powering down the straights intensely rewarding If you want to be truly great at this game, you\u2019ve got to put in a lot of time and effort in, but when everything clicks, it\u2019s rewarding and worth it..... Heroes of monkey tavern is what i would call a sleeper, its desgin and gameplay is great and has what you expect and more from this type of game, i would say its a must to play so don't waste time go and buy it now. A nice character pack, with chill characters. Maybe it gets better later on but the maps present no interesting choices or skill..

Eternal unbeaten classic

Schein takes the platform genre and adds a neat unique twist.

Most of the world is hidden from you as you explore this beautiful and gorgeously rendered world searching for your missing son. Along your way to meet a magical wisp that helps you peer into this unseen world. This is not an easy platform game and will challenge every player with every step. Are you wise enough to step up to the challenge to unveil new dimensions, defeat deadly beasts, solve tricky puzzles and uncover hidden paths through the murky swamp? - Superb Platformer!. Very Trrash  
Waist of money DONT BUY!!!!. This game is like a lighter version of 'Legend of Grimrock', if you are interested in this game and have not played LoG yet, I recommend to play that first.

If you just want more like LoG, then this is for you.

The game is fine actually, the artwork is good, the music nice, the combat and story...eeeh, could be a whole lot worse.. Okay, I know how most of the other reviews complain about Gamespy/multiplayer problems, but if you somehow managed to find your way to this game's Steam page, I doubt you actually have friends.

At least singleplayer works, right?. I just finished my second run and I really enjoyed it. An old style party of four heroes can be selected in a rainy night at the titular monkey tavern between 21 portraits of diverse creatures and 8 different classes. All the classes have their particular skills and limitations, for instance, warriors can equip any kind of armors or else monks do not suffer any penalty for bare-hands combat. The dungeons are full of traps, secret passages and magical items so that any character can be customized very well and the game keeps interesting and satisfying until the last battle.. An absolute joy!!!.Brilliantly done. One of the best (if a little short) rides in VR. gt;hear about game on Roosterteeth video

>see on sale
